### Youth Online : Against early school leaving in Europe Barcelona, Spain April 2019

In order to analyse early school leaving phenomenon in detail, European partnerships involved in *Youth Online* Erasmus + Project met in Barcelona, between 22<sup>nd</sup> and 24<sup>th</sup> May 2019. School Saint Gervasi in Mullet, Barcelona, hosted the team of experts, teachers and representatives of School Institutions in Europe : they handled the topic of **school drop out**, mostly focusing on the results of a survey about “students’ satisfaction” which had been previously submitted to pupils in each school.

A further inquiry about **risks analysis** was implemented : it is an analysis about potential social, family and environmental risks exposing students to school dropout. The test is going to be submitted to teenagers further to Barcelona meeting.

Proposals about the content and the final layout of **Youth online App** were also discussed: the App will be the final output of the Project and will hopefully provide students and teachers with a helpful weapon against early school leaving.
